

FARA DIBA MAHARANI

Pangkal Pinang | 0814-4008-6672 | farad069@gmail.com |
<https://www.linkedin.com/in/faramhrni/> | <https://github.com/faramhrni> | [Portofolio](#)

Mathematics student at Sriwijaya University with experience in data analysis, SQL databases, dashboard development, and data validation. Skilled in Python, MySQL, and Excel for data processing and reporting. Strong analytical thinking with hands-on experience supporting data-driven decision making through real-world projects and internships.

EDUCATION

Sriwijaya University – Ogan Ilir, Indonesia 2022 – 2026
Bachelor's Degree, Mathematics, GPA 3.83/4.00
Relevant Coursework: Statistics, Database Systems, Algorithms & Programming, Numerical Methods, Artificial Intelligence, Artificial Neural Networks, Data Analysis.

SMAN 1 Pangkal Pinang – Bangka Belitung, Indonesia 2018 – 2021
Major in Natural Sciences.

WORK EXPERIENCE

Database Laboratory Assistant Matematika 2024

- Assisted lecturers in database laboratory sessions
- Guided students in SQL query creation, debugging, and optimization
- Supported database learning activities and technical troubleshooting

Integrated Production Planning and Meteorology PT TIMAH TBK

Data Analyst (July 2025 – August 2025)

- Developed a web-based system to monitor tin production data
- Managed and processed production data using MySQL database
- Built interactive dashboards for data visualization and analysis
- Performed data cleaning and validation to ensure data quality
- Identified patterns and trends in production data
- Supported reporting processes and data-driven decision making

SKILLS

Data Analysis & Tools:

Microsoft Excel, SQL, MySQL, Python, R, SPSS, Data Visualization, Dashboard Reporting, Statistics

Programming:

Python, SQL, PHP, JavaScript, C++, HTML, CSS

Soft Skills:

Analytical Thinking, Problem Solving, Communication, Leadership, Teamwork, Time Management

AWARDEE

- 2023 – Bangka Belitung Government Scholarship
 - 2024 – Bakti BCA Scholarship
-

TECHNICAL PROJECTS

Tin Production Monitoring System — PT Timah Tbk (*Data Driven System, Team*)

- Developed a web-based monitoring system for tin production analysis and reporting.
- Built dashboards to visualize production trends.
- Processed and structured production data using MySQL database
- Performed data validation and ensured consistency of production data
- Enabled users to filter and analyze data by month and year
- Supported reporting through automated data export features
- **Key Achievement:** Improved data accessibility and streamlined reporting process, enabling faster and more efficient production analysis
- **Tools:** HTML, CSS, JavaScript, PHP, MySQL

Chronic Kidney Disease Classification (*Machine Learning Project*)

- Compared multiple algorithms (SVM, Logistic Regression, C4.5, Ensemble)
- Processed and prepared dataset for classification analysis
- Evaluated model performance and accuracy
- Conducted basic data analysis and interpretation
- **Key Achievement:** Successfully compared multiple classification models to identify the best-performing algorithm for chronic kidney disease prediction.
- **Tools:** Python, Scikit-learn, Pandas, NumPy

Land Application Monitoring System - PT Timah Tbk (*Data Management System - Team*)

- Developed a system to manage and monitor land application data

- Built dashboards for tracking application status and trends
- Processed and organized data for better accessibility and reporting
- Ensured data integrity and consistency within the system
- **Key Achievement:** Enhanced monitoring and transparency of application data, improving efficiency in tracking and decision-making processes
- **Tools:** HTML, CSS, JavaScript, PHP, MySQL
